

Meters

In the Meters tab, you can view all automatic, manual and virtual meters in their respective locations and groups. Using this screen, you can create your own virtual meters based on the measurement points for one of the utilities, which are displayed in the system. The virtual meters you create will be visible to other users who have access to a given location.

The screenshot shows a table of measurement points with the following columns:

Measurement name	Measurement SN	Tenants	Location	Group	Medium	Unit	Type	Input name	Input id	Input SN	Date time	Sign	Factor	Actions
0217075073	0217075073	Chorzów III	DCS	Active energy received	kWh	Automatic	0217075073	386387772	0217075073	900	+	1		
0715531120	0715531120	Chorzów III	DCS	Active energy received	kWh	Automatic	0715531120	390879472	0715531120	900	+	1		
0716045002	0716045002	Chorzów III	DCS	Active energy received	kWh	Automatic	0716045002	390879474	0716045002	900	+	1		
0716045007	0716045007	Chorzów III	DCS	Active energy received	kWh	Automatic	0716045007	390879476	0716045007	900	+	1		
0716045023	0716045023	Chorzów III	DCS	Active energy received	kWh	Automatic	0716045023	390879503	0716045023	900	+	1		
0716045039	0716045039	Chorzów III	DCS	Active energy received	kWh	Automatic	0716045039	390879499	0716045039	900	+	1		
0726047006	0726047006	Chorzów III	DCS	Active energy received	kWh	Automatic	0726047006	390879478	0726047006	900	+	1		
1000864609	1000864609	Chorzów III	DCS	Gas consumption	m³	Automatic	1000864609	390879486	1000864609	900	+	1		
1000864742	1000864742	Chorzów III	DCS	Gas consumption	m³	Automatic	1000864742	390879509	1000864742	900	+	1		

- 1 Location and group filters
- 2 “Create a new virtual meter” button
- 3 Name of the meter | The tenant to whom the meter is allocated
Location | Group | Utility | Unit
- 4 Meter type (automatic, manual or virtual)
- 5 Name and ID of the measurement point assigned to the meter.
(Virtual meters may consist of multiple measurement points)
- 6 Total cost of a utility in the latest billing
- 7 Prepayment made
- 8 Balance
 - negative value = overpayment
 - positive value = amount due

HOW TO USE: To create a new virtual meter in the system, go to the **Meters** tab in the side menu, then click on **Create measurement** button.

EXAMPLE: To obtain a chart showing a comparison of total gas consumptions on all independent gas meters located within a given building, you can create a new virtual meter which will combine all the measurement points into one series of data. After saving, the meter will be shown on the drop-down menu of modules such as the Consumption chart.

- 1 Enter the name of the new meter, e.g. "Gas consumption total for DC1 hall"
- 2 (Optional) Enter ordered capacity
- 3 Assign the meter to a proper group
- 4 Select the utility measured by the meter
- 5 Indicate whether the meter should be editable by other users
- 6 Select measurement points to be summed by the new virtual meter
- 7 Set the sign and multiplier to be used on the measurement point for calculations
- 8 Save the settings
